SUDOERS INTRODUCTION

We Integrate Technology with Human

We are working with both individuals and businesses from all over the globe to create solutions and solve problems with cost-effective awesome IT solutions.

We work closely with startups and companies to launch products from the ground up – from the idea stage to taking the product to market.

OUR FOCUS AREA

We offer expert enterprise server development, comprehensive networking solutions, and seamless mobile app creation. Our custom web and native development services ensure beautiful, functional websites and apps for all your business needs.

Enterprise Servers Development

We solve difficult problems with custom patches, alterations to the server's engine, and more. Our developers are leading experts in server Development.

Enterprise Networking Solution

We provide comprehensive and customized networking solutions to small and medium-sized businesses. We perform full-service IT management for organizations with service and security needs.

Mobile App Development

From iPhone and Android apps to iPads and Windows tablets, our skill is in creating mobile apps and mobile websites that work seamlessly across an ever-increasing number of devices.

Bespoke Web & Native Development

We create websites and web apps that balance beauty and usability, from creative company brochure sites and blogs to the most complex E-commerce sites and social networks.

NETWORK / SERVER SOLUTIONS

Providing you with the finest hosted services available anywhere. Our technical experts do not simply follow the herd.

We always strive to find the best, most effective ways to serve you and provide solutions to help you meet your challenges.

1. Network / Server Monitoring
2. Centralize Log
3. Application / Database Server
4. Firewall
5. Load and Balancing
6. Network / Server Automation System
7. Server Virtualization
8. High Availability System
9. Server Redundancy
10. Disaster Recovery
11. Support and Maintenance

SERVER / NETWORK SECURITY

We believe that an IT security strategy aligned to the needs of your business is essential to future growth and innovation.

We help you create and maintain a strong security foundation with interconnected solutions that span the enterprise. From the endpoint to the data center to the cloud, mitigate risk and reduce complexity so you can move your business forward.

1. Web Application Firewall
2. Security Auditing

STORAGE MANAGEMENT

Achieve faster response times and lower your total cost of ownership (TCO) with data center and virtualization strategies designed to match your workloads.

From storage, networking, and servers to software and beyond, our flexible modern architectures span a broad technology portfolio, delivering a distinct advantage over siloed vendors who work inside only a single domain.

Whether you need performance-optimized flash technologies, ultra-dense storage enclosures, or traditional or software-defined storage (SDS) solutions, we can help you choose the right options for your organization's needs.

1. Network Storage
2. Data Archiving

SOME OF OUR PARTNERS & CLIENTS

By segregating into many departments, we can concentrate solely on a particular client and his requirements.

Feel free to scroll through it and select the service that suits you best.

WE DO FOR THE LOVE OF INTERNET

We design and develop websites. This means that we give the best of both worlds all in-house.

A lot of developers don't have a good eye for design and user experience and a lot of designers don't know the nerdy code stuff. We take both very seriously.

WordPress is our weapon of choice for projects where the user needs complete control to grow and edit their site. No 'off the shelf, it might fit what we want' scenarios. We build bespoke themes to fit your and your user's needs. With the perfect admin area to keep your site up to date whenever you want. Simple.

1. Web & E-Commerce Development
2. Server, Domain & Maintenance
3. Digital Marketing & SEO
4. UI/UX, Design & Prototyping

INNOVATIVE PROJECTS SHOWCASE

HIGHLIGHTING OUR SUCCESSFUL ENDEAVORS

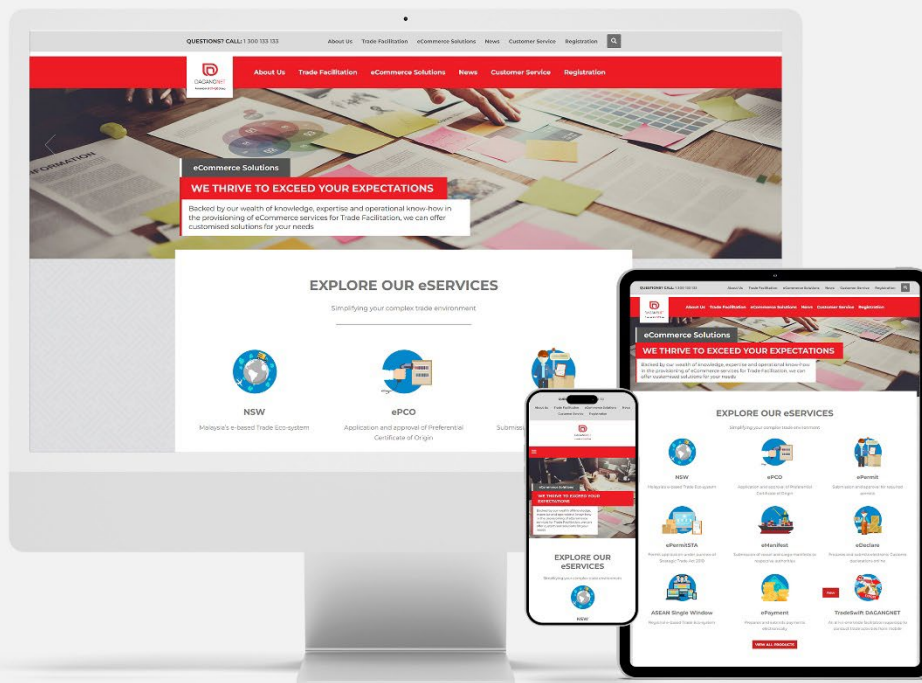

Explore our portfolio featuring innovative mockups and project examples, showcasing our expertise and successful outcomes in various domains.

DagangNet

Platform: CMS Wordpress

Company: Dagang Net Technologies Sdn Bhd

Introduction: Dagang Net Technologies Sdn Bhd (Dagang Net) has pioneered and spearheaded initiatives aimed at creating paper-less, electronic Customs-related services to ease the facilitation and streamlining of international trading processes for the import and export, trade and logistics industries.

Sawit Secure

Platform: CMS Wordpress

Company: Malaysian Palm Oil Board

Introduction: This SawitSecure 2.0 app provides procedures to reduce the likelihood of alien pathogens and pests being established in Malaysia and minimizes the impacts of pest incursion.

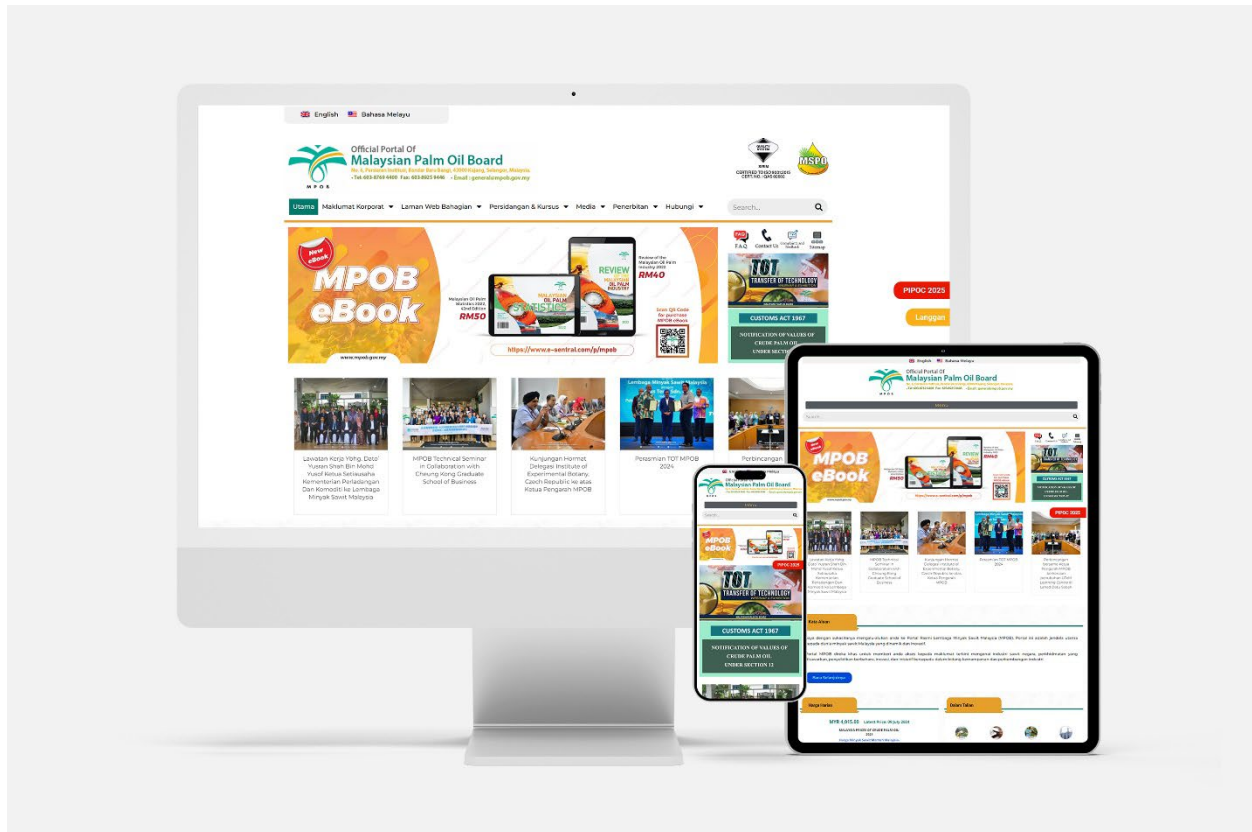

MPOB

Platform: CMS Wordpress

Company: Malaysian Palm Oil Board

Introduction: As the most versatile and productive oil crop, the oil palm has responded well to investments in research and technical promotion. Growth in the upstream sector has a cascading impact along the entire value chain, and MPOB as the custodian of the Malaysian oil palm industry continually places importance on R&D and services along the whole value spectrum.

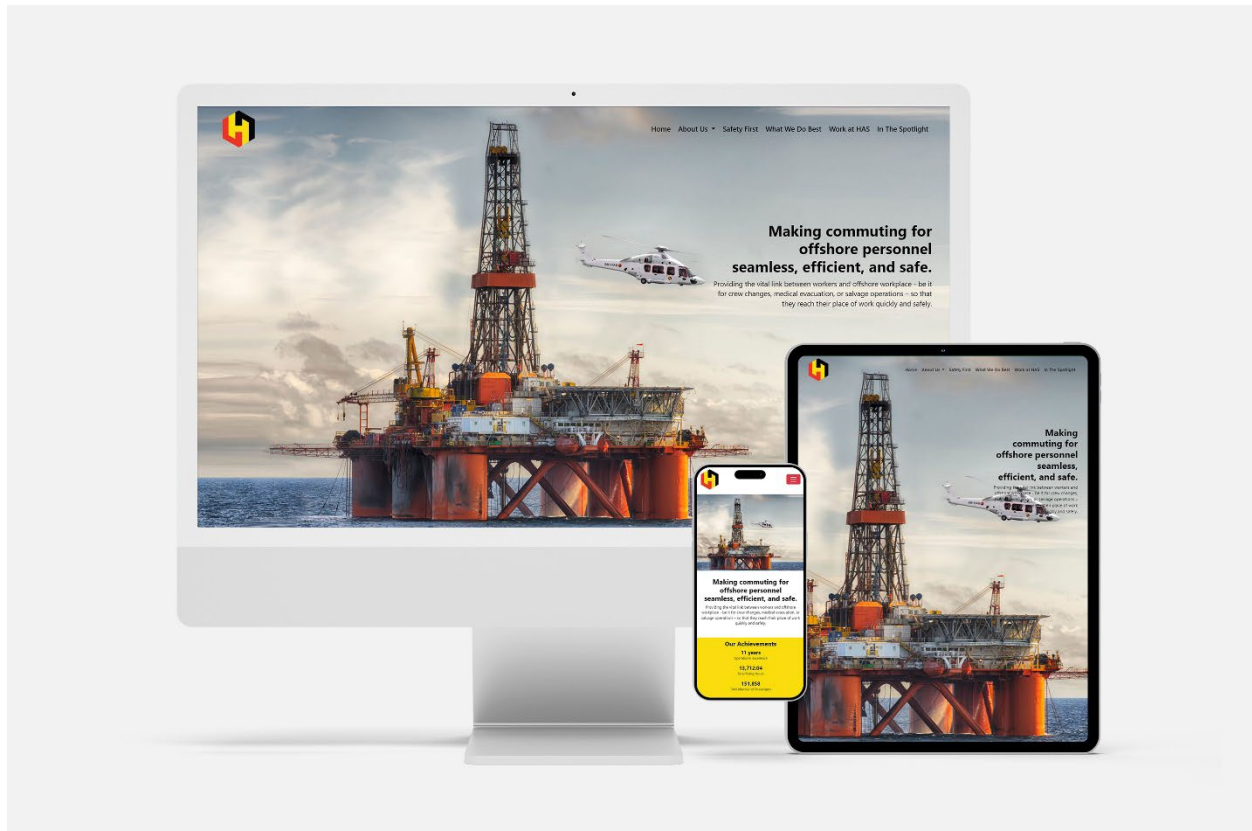

HAS

Platform: HTML

Company: HAS International Sdn. Bhd

Introduction: HAS International Sdn. Bhd. (“HAS”) is built on more than a decade of expertise, extensive partnerships, and commitment to our clients in the oil and gas sector. We mobilise a new era of growth in offshore helicopter aviation — one that balances the current needs of our clients with the challenging environment they operate within, delivering what is essential and at the same time, supporting clients to attain operational sustainability.

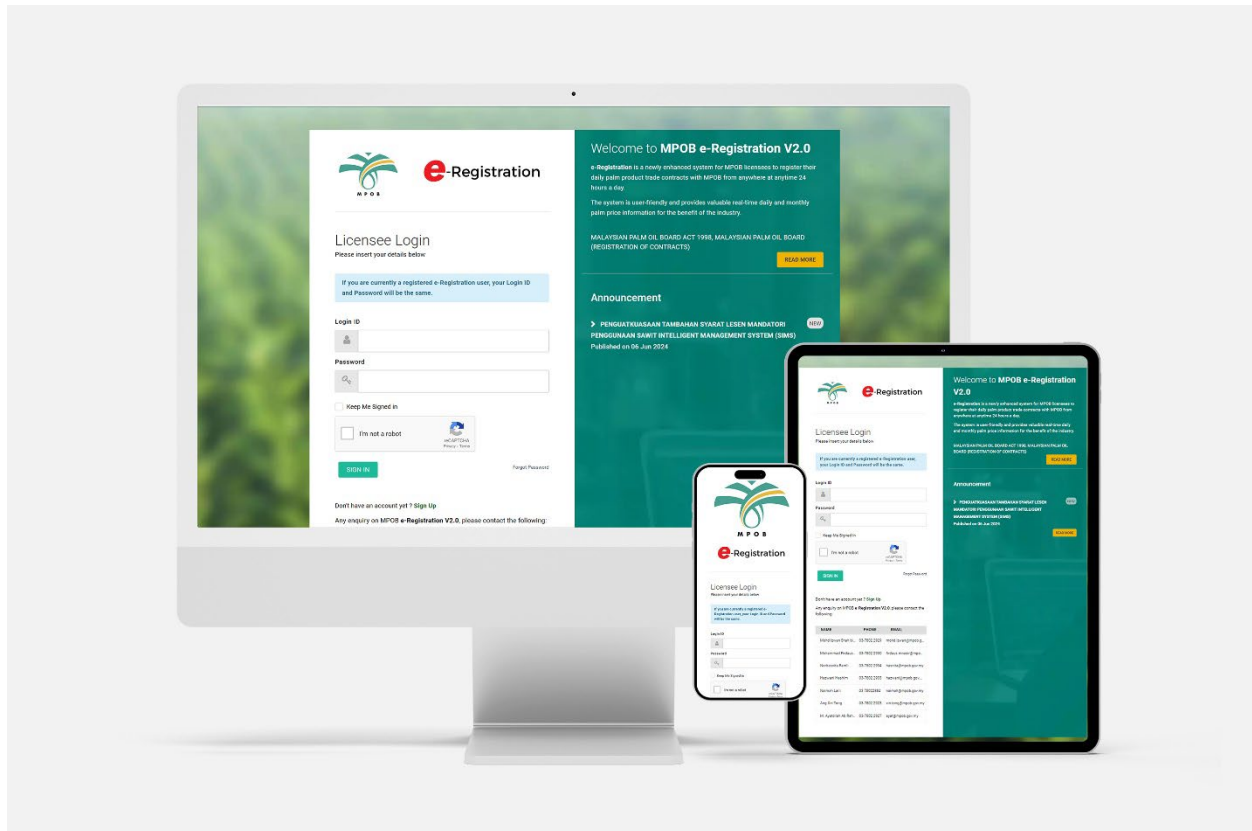

e-Registration

Platform: Laravel

Company: Malaysian Palm Oil Board

Introduction: e-Registration is a newly enhanced system for MPOB licensees to register their daily palm product trade contracts with MPOB from anywhere at anytime 24 hours a day.

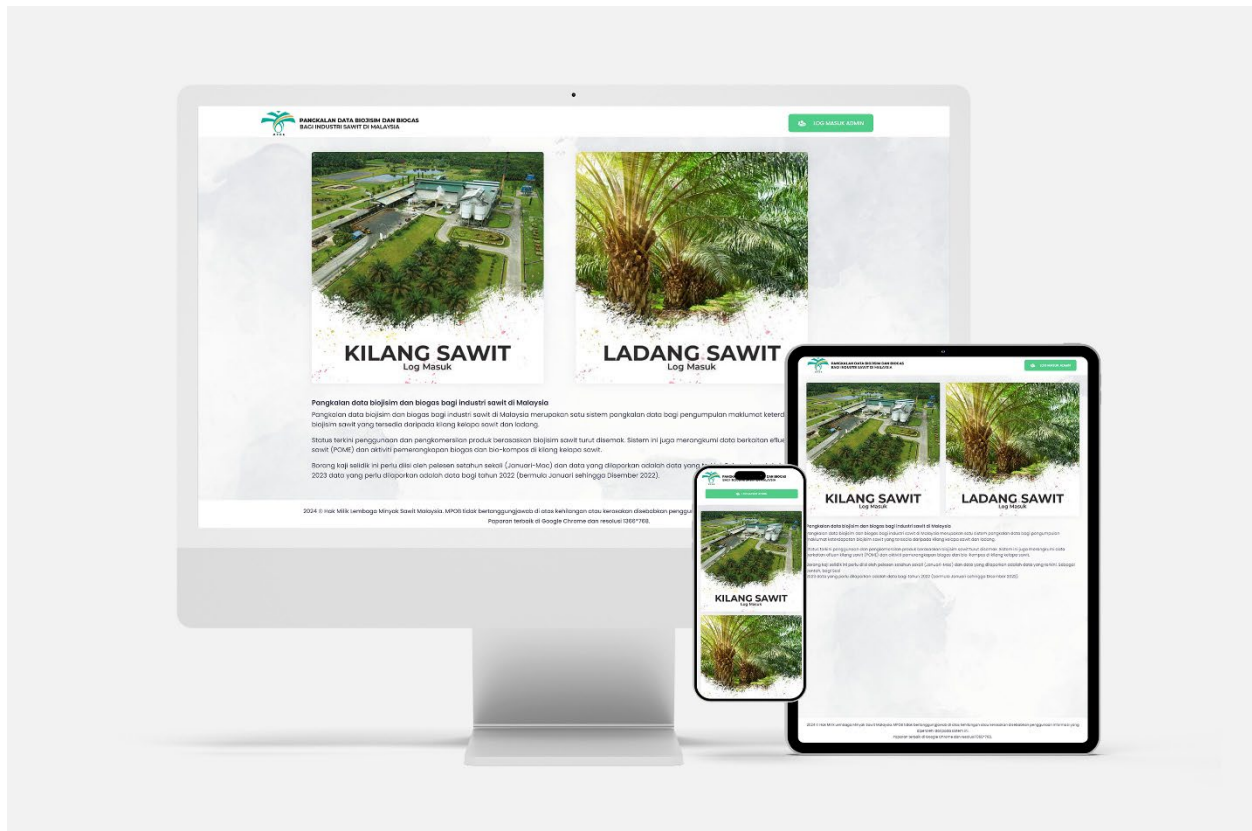

Biomass

Platform: Laravel

Company: Malaysian Palm Oil Board

Introduction: The Palm Oil Biomass and Biogas Database for the Palm Oil Industry in Malaysia is a database system for collecting information on the availability of palm biomass from palm oil mills and plantations.

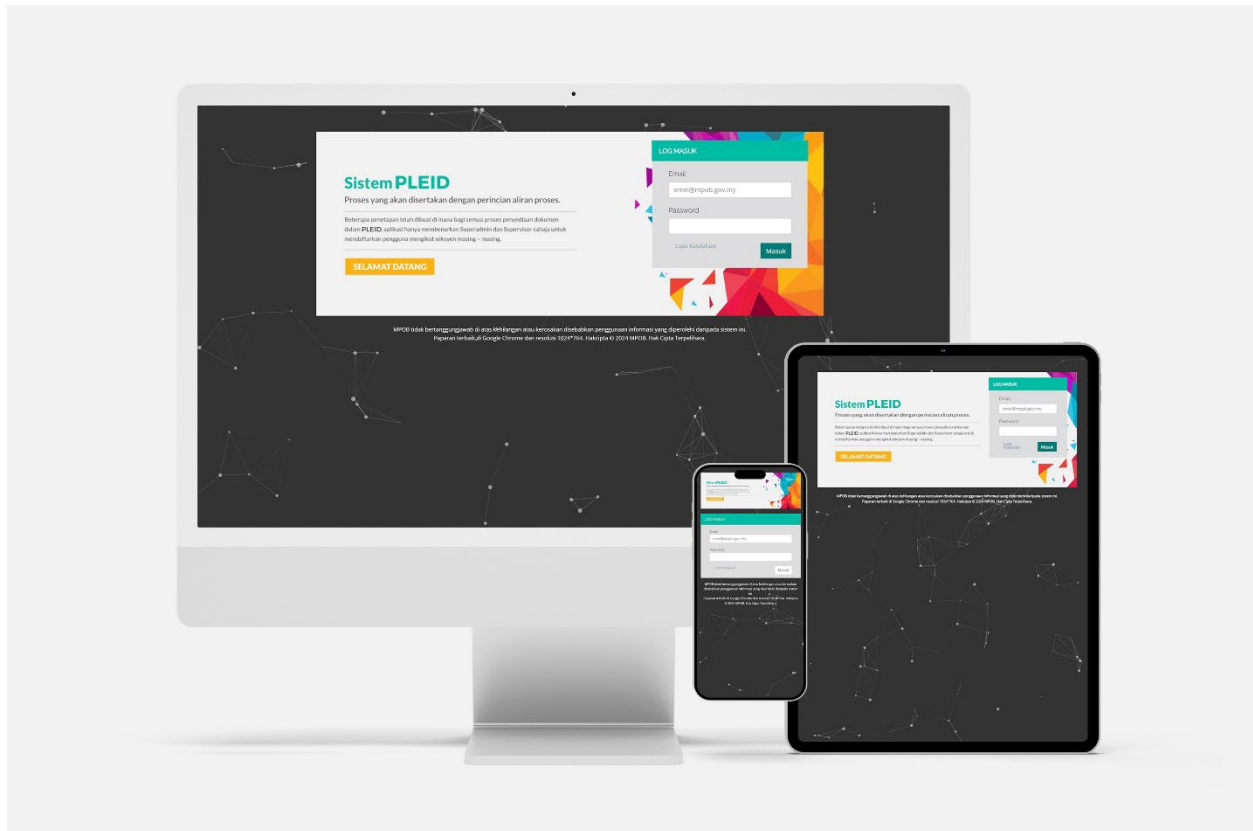

PLEID

Platform: Fat-Free

Company: Malaysian Palm Oil Board

Introduction: Document Preparation for MPOB to Provide Reporting for the Processing, Pricing, Export, and Computer Sectors. The Malaysian Palm Oil Board (MPOB) is a premier government agency entrusted with overseeing the palm oil industry in Malaysia. One of MPOB's critical functions is the meticulous preparation of documents to ensure accurate and comprehensive reporting across various sectors.

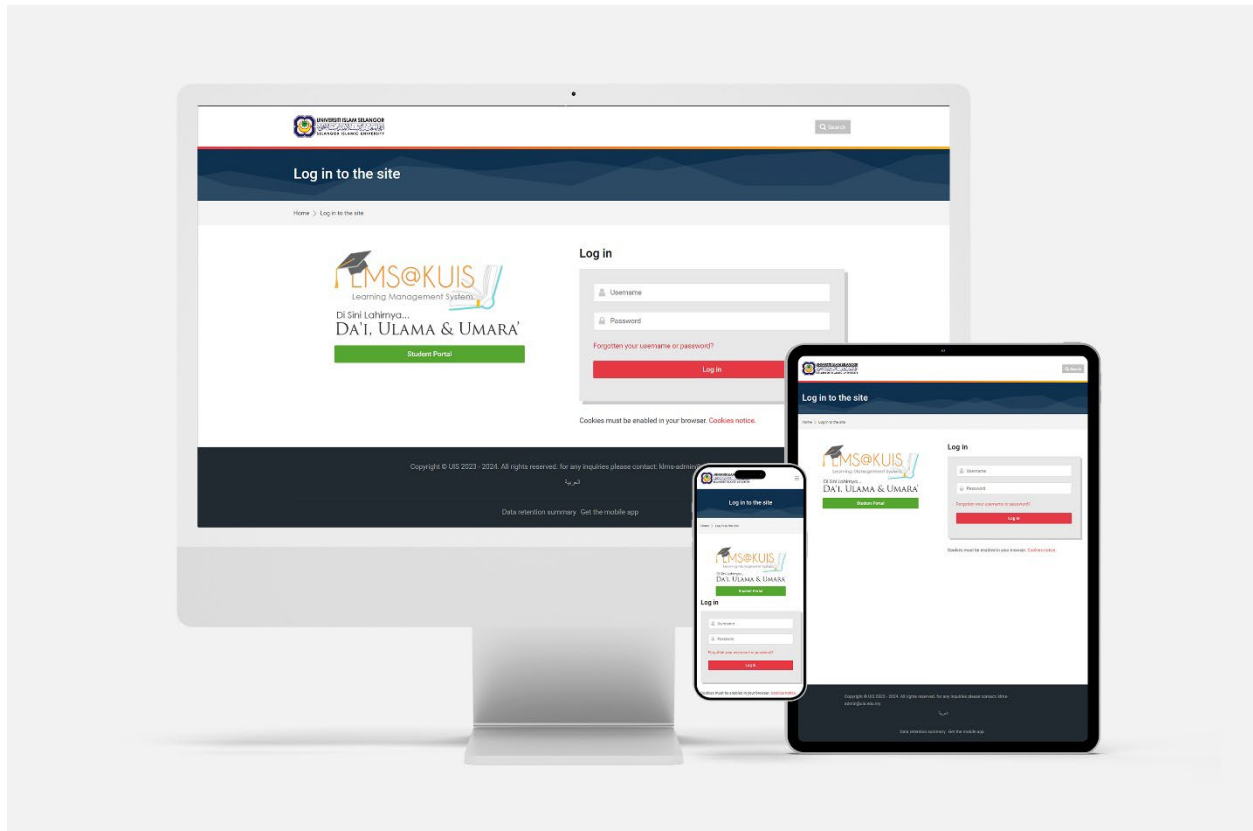

KLMS

Platform: Moodle

Company: University Islam Selangor

Introduction: Moodle serves as an essential e-learning platform for Universiti Islam Selangor, providing a comprehensive solution for online education. It facilitates course management, allowing instructors to create and organize course content, assignments, and assessments effectively. Students benefit from easy access to learning materials, interactive forums, and collaborative tools, enhancing their educational experience.

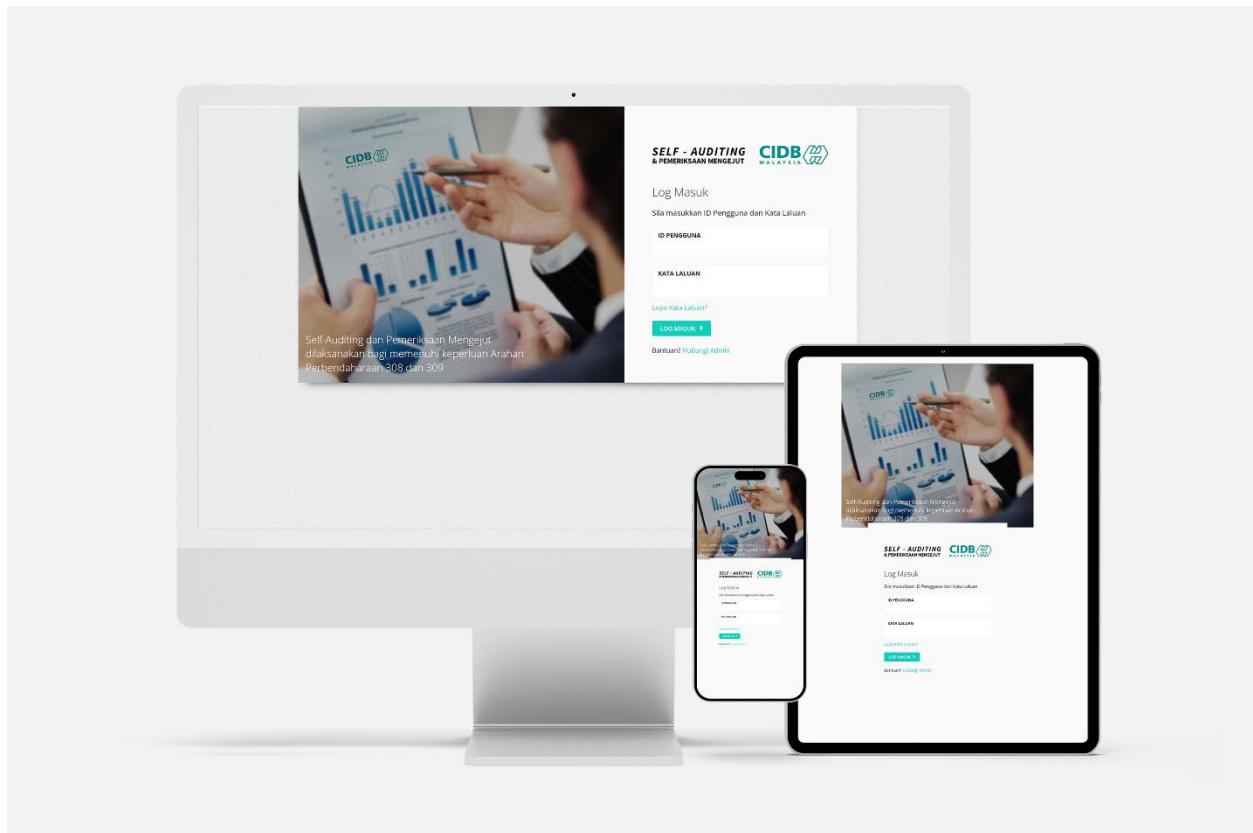

Self Auditing

Platform: Laravel

Company: CIDB Malaysia

Introduction: Self-auditing and surprise inspections are conducted to fulfill the requirements of Treasury Instruction 308 and 309 for CIDB Malaysia, ensuring compliance and accountability in operations.

LET'S SEE OUR PRODUCTS

WE INTEGRATE TECHNOLOGY WITH HUMAN

Bringing Global to Local IT Solutions. We offer these products to help our clients meet all the needs and requirements of their projects. Client satisfaction is our top priority.

PICKPACKET (INTERFACE SERVER)

Keeping up with technological advancements can be overwhelming, and you can't be an expert in everything.

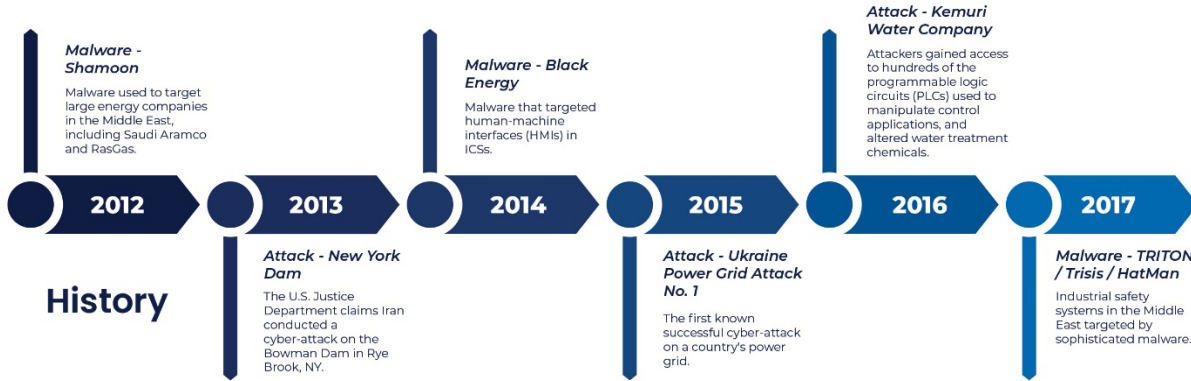

You need reliable and trustworthy IT advice, planning, and management services you and your people can depend on. We would like to offer you:

1. Cutting-edge security technology to protect your public-facing servers.
2. High-level security structures that protect you and your customers
3. User-focused tools and training that make implementing security easy.
4. Long-term management of IT security infrastructure

Meet Industrial Control System (ICS) Requirement

One of the biggest problems in ICS is, where the infrastructure is planned before any cyber-attacks exist and it is not possible to use IPS (Intrusion Prevention System) or WAF (Web Application Firewall) in the network firewall as it will cause more problems than an actual intrusion.

1. ICS Standard and met ISA99 and ISA/IEC 62443 requirements.
2. Protect and hide technology blueprints from detection.
3. Load balance internal servers to manage traffic.
4. Block access to certain restricted content.

Protect your ICS with us

Pickpacket

Enterprise Interface Server

- Intrusion Filter**
- Transparent Plug and Play Solutions**
- Load Balancing**
- Assessment Existing IT Security**

Interface Server

For years, attackers have assailed network and system-level vulnerabilities, fueling demand for products like firewalls and intrusion detection systems.

As these products mature and IT security teams learn to better handle network security, the information security industry is seeing a visible increase in attacks moving up the stack to target application-level vulnerabilities.

Implementation and Ongoing

Once we've determined what IT Security infrastructure, upgrades, and maintenance you need to optimize productivity and business growth, you can trust us to manage and roll out your IT Security solutions with minimal disruption.

We can also expertly maintain and manage your system - it's a worry-free option that allows you to focus on your business, now and in the future.

Transparent with Plug and Play Solution

Our solution will easily integrate with your current topology without any modification. Now that our strategic advisors have worked with you to pinpoint and prioritize your IT needs, the next step is to identify the systems and applications that will best support your business goals and formulate a smooth plan for implementation.

Assessment of Your Existing IT Security Environment

What is your operating efficiency? Are your security measures up to standard? We'll evaluate your current IT security environment and make recommendations for scaling up without breaking the bank and applications that will best support your business goals and formulate a smooth plan for implementation.

Assessment of Your Existing IT Security Environment

What is your operating efficiency? Are your security measures up to standard? We'll evaluate your current IT security environment and make recommendations for scaling up without breaking the bank.

BYZANTIUM (PRIVATE CLOUD)

We provide private cloud solutions that offer enhanced security, control, and customization. Our services ensure reliable performance and scalability tailored to your business needs.

The Best Features We Can Offer

Lower-Infrastructure-Cost

Data centers can lower IT infrastructure costs with projects such as virtualization, server modernization, software-defined data centers, and more. Our private cloud solutions help our clients meet this objective.

Maximum Security

Our private cloud offers high levels of performance, redundancy, and security management. Our technical support team is available around the clock to ensure that you receive proactive and expedited support to keep your business running.

Guaranteed Business Continuity

Scalability is the ability of a system, network, or process to handle a growing amount of work capably or its ability to be enlarged to accommodate that growth. Our private cloud scalability can involve adding or removing processing power or increasing or decreasing storage.

HIGH AVAILABILITY (MULTI_MASTER)

This system will ensure application or system availability by creating redundancy for every server to reduce a single point of failure.

Network traffic will be automatically routed to the available server until no more servers handle the traffic.

High Availability Solutions (HAS)

Reduce
downtime

Grouped
together

Support
Application

Continuous
Operations

HTTP Load Balancer

Using HTTP Load and balancer to accelerate content and application delivery improves security and facilitates availability and scalability for the busiest websites on the Internet.

Load balancing across multiple application instances is a commonly used technique for optimizing resource utilization, maximizing throughput, reducing latency, and ensuring fault-tolerant configurations.

Database Server

MariaDB will be part of this architecture's Database Server. MariaDB is a community-developed fork of the MySQL relational database management system intended to remain free under the GNU GPL.

It is not able to be led by the original developer of MySQL. MariaDB intends to maintain high compatibility with MySQL, ensuring a “drop-in “replacement capability with library binary equivalency and exact matching with MySQL APIs and commands.

Database Cluster

Database cluster is a synchronous multi-master database cluster, based on synchronous replication and Oracle’s MySQL / InnoDB.

When Data Cluster is in use, application can direct reads and writes to any node, and application can lose any individual node without interruption in operations and without the need to handle complex fail over procedures.

Network Attached Storage (NAS)

This Storage is designed for cluster environment. Which mean data will be distributed lively across more than one server to ensure data availability and reliability.

Server Resource Monitoring

This Server will consist of a monitoring tool to survey all available servers and remember what it saw.

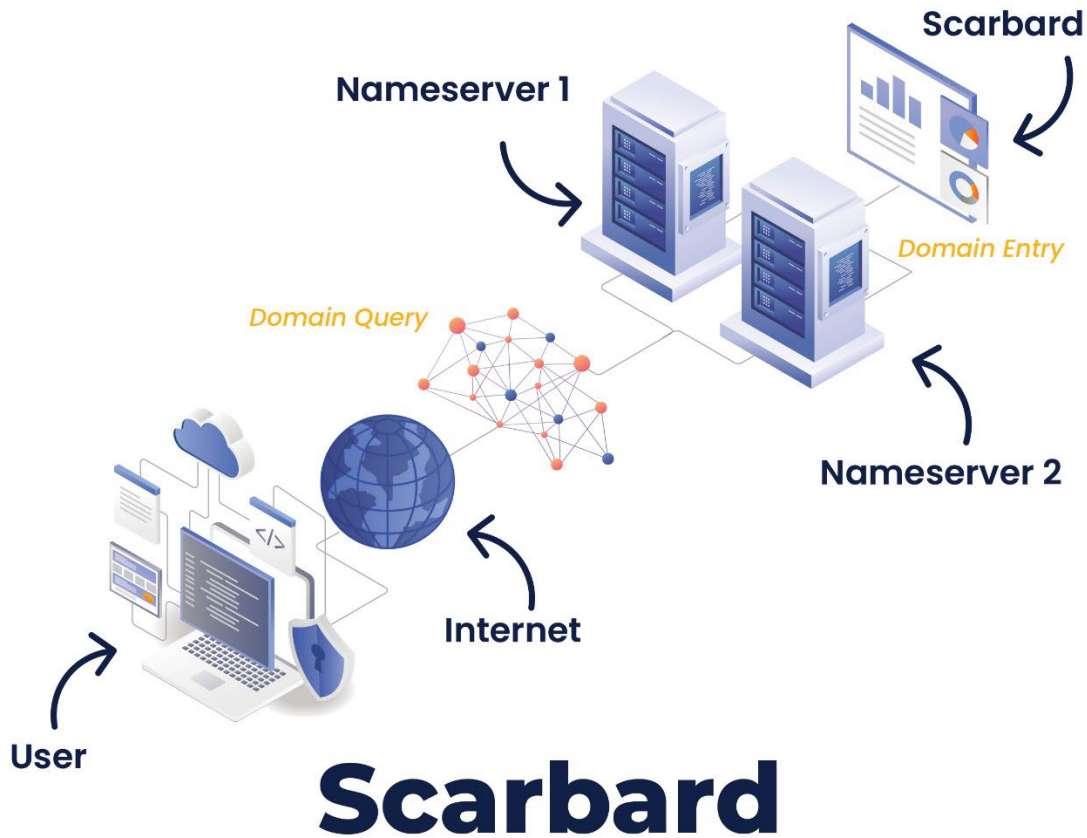

It presents all the information in graphs through a web interface. Its emphasis is on plug-and-play capability. This tool will administrator to monitor the performance of servers.

Webserver

Nginx as a Web Server will be integrated with PHP-FPM to execute the PHP application. PHP-FPM (Fast CGI Process Manager) is an alternative PHP Fast CGI implementation with some additional features useful for sites of any size, especially busier sites.

SCARBARD

DNS management is complex, repetitive, and time-consuming with lots of repetition and copying can lead to error and there are many details to remember.

Manage
Multiple Domain

Domain
template

User
Management

Activity
Tracking

POSTAL

Postal is a complete and fully featured mail server for use by websites, web servers, and Mailbox.

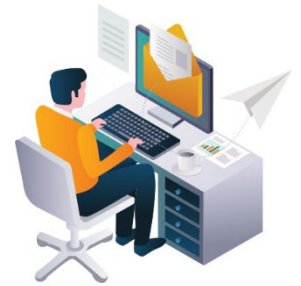

General Features

1. Support for multiple organizations with mail servers and users within.
2. Graphs and stats showing the volume of incoming and outgoing mail.
3. Access to view historical messages.
4. Access to view the full outgoing and incoming message queue.
5. Mail server-wide search tools to find messages that need investigation.

Outgoing e-mails

1. Send messages to the SMTP server or using the HTTP API.
2. Manage multiple credentials per server.
3. Support for DKIM signing of outbound messages.
4. Built-in suppression list to avoid sending mail to recipients that don't exist or can't accept e-mail.
5. Configure per-server send limits to avoid abuse on mail servers.

Incoming e-mails

1. Ability to forward incoming e-mail to HTTP endpoints.
2. Ability to forward incoming e-mail to other SMTP servers.
3. Ability to forward incoming e-mail to other e-mail addresses.
4. Spam & thread checking with Spam Assassin with configurable thresholds and different methods for dealing with spam messages.

PROJECT MANAGEMENT

Our project management services ensure efficient planning, execution, and delivery. We use proven methodologies to keep your projects on track, on time, and within budget.

1. **Communication Management Plan**

Outlines how project information is shared, ensuring timely and effective communication among stakeholders.

2. **Change Management Plan**

Defines procedures for managing project changes to minimize disruptions and ensure smooth transitions.

3. **Issue Management Plan**

Establishes a process for identifying, tracking, and resolving project issues promptly.

4. **Quality Management Plan**

Details quality standards and practices to ensure the project meets specified requirements.

5. **Acceptance Management Plan**

Specifies criteria and procedures for the formal acceptance of project deliverables by stakeholders.
